# Elevating Yachting Experience with Innovative SUBLIO Technology

Frédéric Esnault President Fondateur

Throughout history, the therapeutic benefits of water have been acknowledged for their profound impact on the body and mind. Driven by a passion for all things aquatic, Frédéric Esnault, a self-professed «curious and passionate autodidact,» conceived and introduced an extraordinary innovation that facilitates deep skin regeneration. Drawing inspiration from the transformative effects of water on his own skin during a dip in the Restonica torrent in Haute-Corse, Frédéric Esnault developed an ingenious system named SUBLIO that decupulates water's natural virtues from any water type.

## A French Innovation of Excellence

The SUBLIO technology stands out for its precision and sophistication. It meticulously «calibrates» minerals within the core of the treatment machine's reactor before poly fragmenting and Hyperionizing them, thereby enhancing their cosme-to-therapeutic properties. The unique 'Hyperionization' process magnifies the power of water regeneration, delivering a genuine regenerating experience for the skin. Over time, with repeated exposure to Hyperionic water, the skin rejuvenates, heals, and visibly transforms. «Our device is completely natural; we introduce no additives nor extract anything from the water,» elucidates the designer. Notably, substantial benefits have been recorded in alleviating various skin conditions such as psoriasis. The effectiveness of the patented Sublio technology has been validated through ten comprehensive biological studies conducted by two esteemed Eurofins group laboratories.

“  
Revolutionizing Wellness:  
The Convergence of  
Nature and Innovation  
”

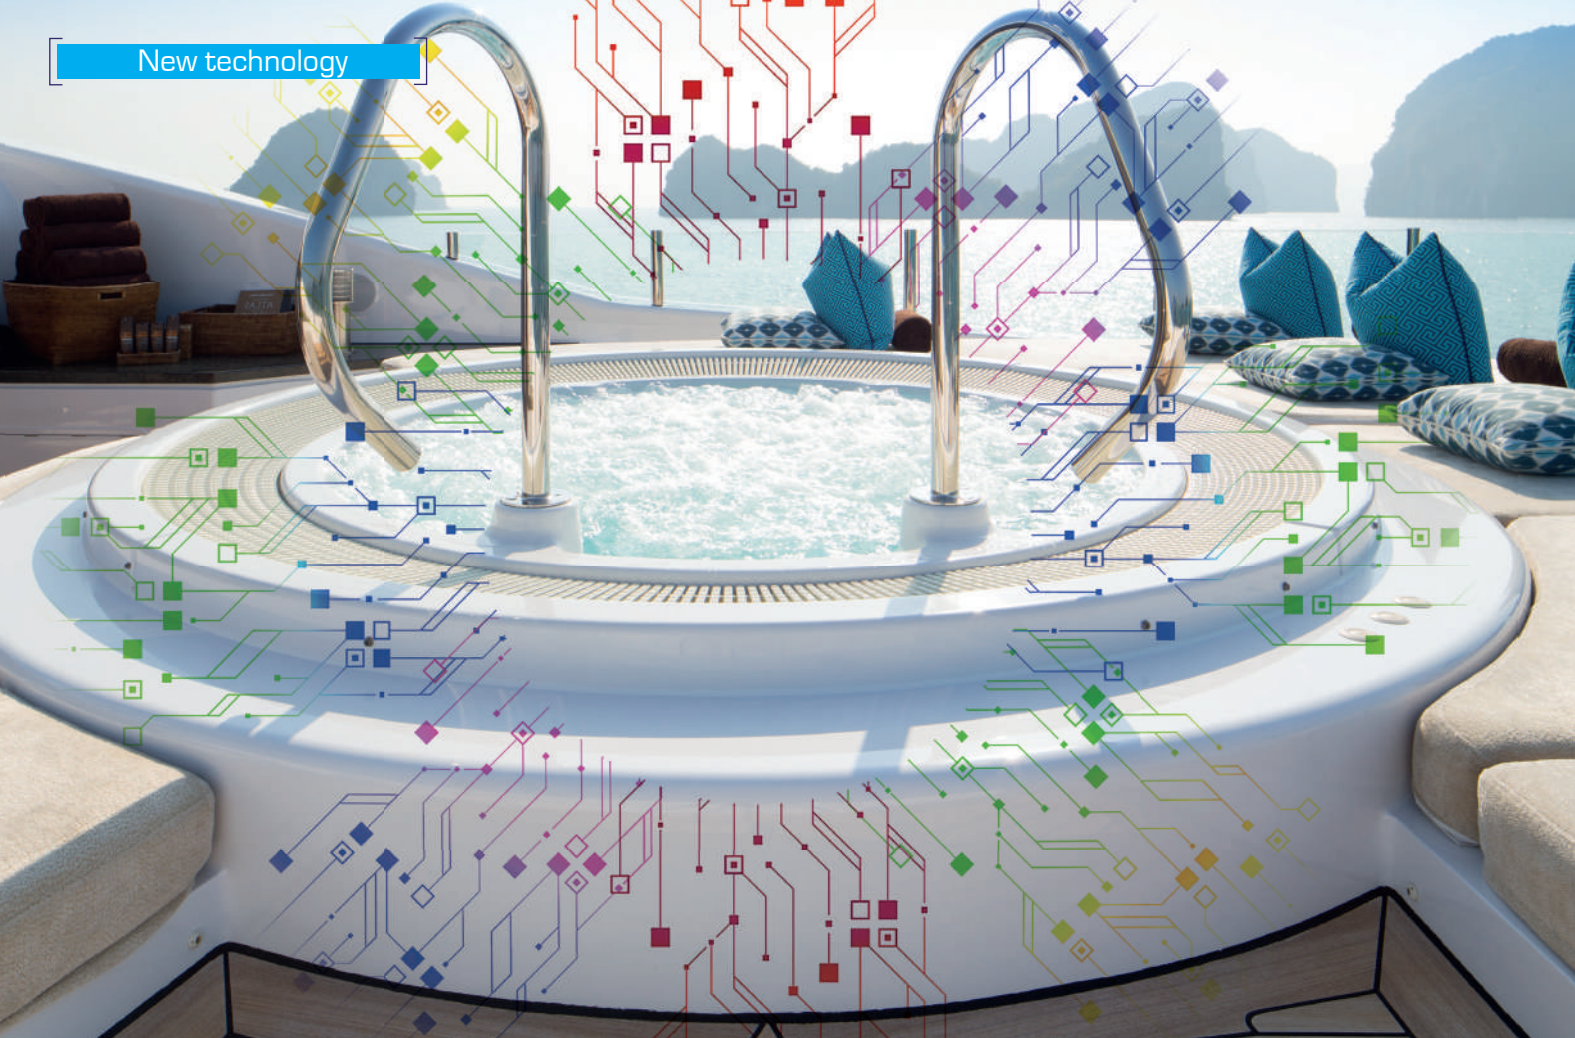

## A Gateway to Unprecedented Yachting Enhancement

The remarkable performance of SUBLIO machines has captivated the attention of luxury yachting professionals. These cutting-edge systems hold the potential to elevate yachts into exclusive wellness and skin rejuvenation hubs. Whether integrated into pools, balneotherapy facilities, bathrooms, or onboard spas, SUBLIO's technology holds the promise of redefining wellness onboard. Notably, the technology exclusively graces the swimming pool of the La Ferme d'Augustin hotel on the road to Tahiti in Ramatuelle. A significant investment of over 750,000 € excluding taxes recently

New technology

La Ferme d'Augustin hotel St Tropez

equipped the largest thermal cure center in France, located in Balaruc-les-Bains, with a Hyperion central unit comprised of nine «Hyperion Water Life Pro-w» machines. These machines augment the Hyperion properties of thermal water utilized in hydrotherapeutic treatments. It is undeniable that this revolutionary, eco-conscious technology will soon capture the attention of yachting leaders, not to mention the growing number of yacht owners opting to embrace this innovation, both in France and across the globe.

### Forging Ahead in Yachting Innovation

In an ongoing pursuit of innovation rooted in Sublio technology, Frédéric Esnault and his team are actively designing new machines that are poised to captivate beauty and water-based care aficionados. Esnault

shares, «We are in the final stages of pre-production for a Hyperion activation suitcase and its miniaturized iterations, which will amplify the penetration (and hence efficacy) of trace elements and active principles found in cosmetics.» These novel developments will prove indispensable to Thalassotherapy centers, Spas, Beauty Centers, and even the yacht itself, ensuring wellness is always at hand—be it at sea, by the shore, in the mountains, or while exploring new horizons.

### Navigating the Future with SUBLIO's Hyperion Water Life Pro Technology

SUBLIO's Hyperion Water Life Pro technology is poised to revolutionize the yachting experience. By harnessing intraseque hydration of water and enhancing its therapeutic properties through innovative means. Frédéric Esnault has introduced a system that rejuvenates the skin and unlocks new realms of luxury onboard. As this technology continues to evolve, it's evident that SUBLIO's impact will be felt not only on yachts but also in private properties and wellness centers, ushering in a new era of rejuvenation and luxury living on the seas. Prepare to embark on this exciting journey into the future of yachting—stay tuned for more exhilarating developments. ■■■
